SUMMARY

Fullstack Developer with 5+ years of experience delivering scalable, production-grade web and blockchain applications used by thousands of users. Known for improving system performance, building secure smart contracts, and collaborating cross-functionally to ship reliable, user-focused products.

WORK EXPERIENCE

Fullstack Developer, Euge Holdings Pte. Ltd.

March 2026 - May 2026

Singapore, remote | Fintech / Payment Infrastructure

- Built Multiple Payment Settings module enabling organizations to pay another organizations through configurable payment methods, using **Express.js, React and PostgreSQL**.
- Developed mobile applications for organization admins and payees using **React Native, Express.js and PostgreSQL**, giving end user a real-time visibility into transaction status and payment activity.
- Migrated database access layer from raw Supabase client calls to TypeORM, improving type safety, query consistency, and reducing developer onboarding friction.
- Implemented frontend UI/UX refinements in React based on design specs, improving visual consistency and usability across the platform.

Fullstack Web3 Developer, Imaginary Ones Pte. Ltd.

Aug 2022 - Feb 2026

Singapore, remote | Web3/NFT/AI Platform

- Built and tested multiple production NFT smart contracts powering collections of **1.000+ NFT** each, suporting presales, public sales and on-chain claim that contributed to **\$1M+ in sales**, built with **Solidity**.
- Built and shipped staking site used by **200.000+ active wallets** to stake Imaginary Ones NFT collections and rewards via raffle, quest and partner collaborations and was built with **Vue.js, Nest.js and MySQL**.
- Designed, built and developed Bubble Token smart contract enabling holders of Imaginary Ones NFTs collections (8.888 IO NFT, 13.888 IR NFT and 1.001 HUGO x IO NFT) to claim token allocations proportional to their total holdings. The smart contract was built with **Solidity** and has **served 38.000+ transactions**.
- Optimized the Bubble token claim backend system built with **Nest.js and MySQL**, reducing signature generation time for whale users from 30+ seconds to under 12 seconds, a **60%+ improvement** that eliminated timeout errors.
- Built Bubble token cross-chain bridge including frontend and backend system enabling token transfer between **Ethereum, Solana and Base** using **layerZero**, supporting consistent on-chain and off-chain state across networks.
- Created and developed Imaginary Carnivals games on the staking site using **Vue.js, Nest.js and MySQL** and has been **played for more than 10.000+ times** by the community.

- Migrated the Imaginary Ones landing site from Nuxt 2 to Nuxt 3 and built 5+ campaign and product launch sites supporting marketing initiatives across the ecosystem, driving community engagement using Vue.js, Nuxt 3, Nest.js and Three.js.
- Led security hardening and performance improvements for Bubio, an AI-driven platform serving 1.000+ users, built with React, Hono, Supabase, and Supabase Edge Functions running Deno.

PT Graphie Global Interaktif

Sep 2020 - July 2022

(include sister company PT. Duckie Multi Meta)

Jakarta, Indonesia | Digital Agency & Web3 Gaming

Backend Developer, PT. Duckie Multi Meta Dec 2021 - July 2022

- Transferred internally to lead backend development on Duckie Land, the group's flagship Web3 gaming platform. Built the landing site from scratch and architected the backend backbone supporting 6 in-platform games using **PHP Codeigniter, MySQL, Javascript, jQuery, and HTML**.
- Initiated and contributed to smart contract development for the Duckie NFT collection and marketplace, establishing the foundation for my role into full-time Web3 engineering.

Web Developer, PT. Graphie Global Interaktif Sep 2020 - Dec 2021

- Designed, built and shipped **10+ full-stack web applications** across diverse industries including e-commerce, healthcare, library systems, delivery services and media using **PHP Codeigniter, MySQL, Javascript, jQuery and HTML**.
- Translated business requirements into technical specs by partnering with clients and PMs, consistently shipping shipping projects on schedule across multiple concurrent engagements.

SKILLS

- **Frontend Development:** Vue, Nuxt.js, React.js, Next.js, Javascript, Typescript, HTML5, CSS3, SCSS, Vuetify, Three.js, GSAP, Tailwind, Framer Motion.
- **Mobile Development:** React Native, Expo, NativeWind.
- **Backend Development:** Node.js, Nest.js, Express.js, PHP, Codeigniter, Firebase, Supabase, REST APIs, JWT-based authentication, Hono, Zod.
- **Databases:** MySQL, PostgreSQL, Redis, Weaviate.
- **Blockchain & Web3:** Solidity, Hardhat, Remix, Web3.js, Ethers.js, Viem, LayerZero, Ganache, Ethereum, Polygon, Solana.
- **Testing:** Jest, Mocha.
- **Build, Deployment & Tooling:** Docker, CI/CD Pipelines, Git, Github, Bitbucket, ESLint, Vite, Webpack, npm, yarn.
- **State Management:** Pinia, Zustand, Tanstack Query.
- **Professional Skills:** Agile & Iterative Development, Cross-Functional Collaboration, API Design & Technical Planning, Code Reviews & Quality Standards, Problem Solving & Performance Optimization.
- **AI Engineering:** LangChain, LangGraph, RAG, Context Engineering.
- **AI Tools:** Claude Code and Windsurf.

EDUCATION

Bachelor of Computer Science, Sanata Dharma University
Yogyakarta, Indonesia

Aug 2016 - Aug 2020
